STARTLING, BUT TRUE

Has it ever occurred to you that in our social system the politician is enabled to reach a position of responsibility without having any training?

He serves no apprenticeship. He masters no course of study. He need pass no examination as to ability. He receives neither diploma nor a license to practice. The veterinary who doctors our dogs and cats is required to show more careful preparation for his calling than is the politician who seeks to assume the RIGHT to direct not only our industrial but much of our personal life.
